- ✔ Active GPS tracking
- ✔ Two- and three-way voice technology offers instant communication with offenders and officers to enable active violation intervention
- ✔ 24 hr plus battery life
- ✔ Waterproof
- ✔ Stores data when temporarily out of range- then automatically forwards information when back in range
- ✔ Tamper-resistant with tamper sensors
- ✔ Set exclusion/inclusion boundaries
- ✔ 95-decibel siren
- ✔ Device vibration when battery needs to be recharged

What you need to know...

In order to provide the best service possible, we test every device in the gps monitoring industry. Our goal is to provide the best solution for separate needs in monitoring.

Not all GPS Monitoring Devices are created equal...

We carry the device that is most tamper proof in the industry.

Without mentioning names, companies, or product detail, we feel the need to inform and educate the public about the differences in products available on today's market.

Features:

- No land-line required
- No batteries required
- Easy set-up
- Tamper resistant
- Motion detection

HARDWARE

The TrackerPAL II combines global positioning system (GPS) and radio frequency (RF) tracking technologies with power of voice communication all in a single-unit. Supervising officers can create restrictions based on time of day (curfew) or specific location (exclusion/inclusion zone). When an offender is in violation of any set restrictions, an agent at our Offender Monitoring Center will immediately respond according to protocols set by the supervising officer and/or Field Workers in near real-time.

SOFTWARE

Our software has the capability to view historic events on location, battery life, and alerts. Times zones are able to be set up to apply home detention rules, inclusion zones and exclusion zones. Once protocols are set up, in the event of any violation, the assigned officer will be notified immediately. Our software tracks the where-about's of clients every 5 minutes, 24hrs per day. In the event of a violation, that frequency changes to 60 seconds until client returns to compliance.
